Mr. Rodman, the Democratic

candidate for the office of Attorney-General,

Gen. D. H. Hill, in an article published

in his Atlanta Magazine, says that the

ally, that it is the duty of voters in the

South to elect men to office who can

confront the people with a satisfactory

to the dominant party. He means that

their true policy is to elect men not ob-

jectable to the radicals, who are the

controllers of Congress and of the North,

and do what they please with "the con-

quered provinces of the South. Seeing the

caption of the article, and the imminence

of being opposed still more strongly,

he would have his fellow-citizens look

before a miserable necessity, and only the

radical will—*Los Journal*.

Our neighbor says a little rhetoric in

the subject of our having called attention

to the very able article in *Atlanta*. His

magazine, because we recommended

some useful legislation.

Let us say, our neighbor would have

the Union and never been out of it, and

which is to provide, independent or

unassisted, with the Southern States, these

States to voluntarily unite with us, and

which would have the South to do a necessity

that recognizes as unavoidable.

The Federal Government has just as much

authority to interfere in Kentucky as it

has in the interest of the Union, and the

party will not hesitate any more in one

case than the other. The Journal's party

GENERAL NEWS.

The negro hands employed as rollers in the Richmond tobacco factories, are striking for two dollars per cwt. At present they receive \$1.75.

Track laid on the Union Pacific during the week ending May 11, eleven and four-fifths miles. Total amount of track laid this season, seventeen and one-fifth miles. The road is finished 322 miles west of Omaha.

The following are announced as candidates for Governor of Alabama: Alex. B.

of Hialeah, and the present incumbent, Gov. E. M. Patton, for re-election.

One of the pleasing conditions of life in Chicago is the constant prevalence of exhilarating breezes from the lake or the prairies. Incumbent strangers, however, are sometimes troubled by a "harmful breeze," or cannon-ball in each chest-pocket, for ballast, are in danger of drifting into the river before these zephyrs. A dozen dead bodies have been recovered from that treble in the last three weeks.

Colonel Conger, commander of the party by whom Booth was captured, and who took charge of the trial, at the effects of which was before the House Judiciary committee. Monday, and gave his testimony in relation to that affair. He bears that, according to his recollection, the diary was not spoiled when he took

Fort Philip Kearney is in the heart of the disputed Sioux country, and is at the crossing of the Piney Fork of Powder river, on the road from Fort Laramie direct to Montana. It is a new and important post, being the principal one on the powder river road, and is the scene of what is called the Phil. Kearney massacre, in December last. It is likely, too, to be the center of the important movements against the hostile Sioux during the coming summer.

Ohio which permits persons charged with various offenses to give their testimony. It provides that "in the trial of all indictments, complaints, and other proceedings against persons charged with the commission of crimes or offenses, the person so charged shall, at his own request, but not otherwise, be deemed a competent witness, nor shall any reference be made to or any comment upon such neglect or refusal." The attempt is made in the last Legislature of this state to pass a law of the same kind. In some of the Eastern States such laws have been enacted, and are said to have been found to act admirably, receiving the approval of eminent jurists for the manner in which they protect the administration of justice. They prevent

Montana is believed to be the richest mineral country in the world. In 1866 the population was less than 40,000, and the yield of gold was \$18,000,000. In the same year Idaho produced \$17,000,000. Colorado \$17,000,000, Nevada \$16,000,000, Oregon \$8,000,000. California, with a

population more than ten times as great.

Give Nature a Lift.

People expect too much of Nature. They trifle with their health and their constitutions, and then are surprised that they fall sick.

The pressure of constant mental or bodily labor upon the animal powers is tremendous. Very few systems and constitutions can bear up against this pressure unassailed. Add to this the unhealthy influences which lurk unseen in the air we breathe, the water we drink, the lassitude produced at this season by the change from the rise of winter to

the warmth of spring, and it would seem to require a most superhuman vigor to keep in perfect health without reinforcing the physical senses.

But how reinforce them? Certainly not with adulterated stimulants. There is no poison in the sulfur air, or in the atmosphere of terrace-heated rooms, or work-shops, or factories, so pernicious to those dreadfully burning lungs.

Why use them, when **HOMETTER'S STOMACH BITTERS**, a vegetable tonic without alloy, are everywhere obtainable? Nothing has ever been offered to the feeble and debilitated so harmless to its nature, so powerful, and so invigorating.

Effects, as this celebrated STOMACH and AL-
TERATIVE.
In the army and the navy, in new settlements
and in crowded cities, by old and young, rich and
poor, it is used as a PROTECTIVE AND RES-
TITUTIVE MEDICINE, with most gratifying
results. mis d2aw2wew
